1. Reporting entity

Enterprise Oilfield Group, Inc. (“Enterprise” or the “Company”) was incorporated under the *Alberta Business Corporations Act* on March 23, 2004 and is domiciled in Canada. The Company is publicly traded on the TSX Exchange under the symbol “E”, effective August 13, 2007. The Company is a construction services company operating in the energy, utility and transportation infrastructure industry.

A significant portion of the Company’s operations relate to energy production customers in Alberta. The Company’s activity levels follow the seasonal pattern of Alberta’s oil and gas exploration industry whereby activity peaks in the winter months and declines during the spring thaw. During spring thaw roads become incapable of supporting the heavy equipment needed to drill and tie-in oil and gas wells. As a result, demand for these types of services generally is the highest in the fall and winter quarters and the lowest in the spring quarter. Services provided to underground utility and directional drilling customers are provided more evenly throughout the year but the spring quarter is also the slowest quarter of the year.

The financial statements of the Company as at March 31, 2012 and December 31, 2011 and for the three month period ended March 31, 2012 and 2011 are comprised of the Company and its wholly owned subsidiaries. The head office, principal address and registered and records office of the Company are located at #2, 64 Riel Drive, St. Albert, Alberta, T8N 4A4. The unaudited condensed interim consolidated financial statements of the Company were approved by the Board of Directors of the Company on May 11, 2012.

2. Significant accounting policies

(a) Statement of compliance

The Financial Statements are prepared on a going concern basis and have been presented in Canadian dollars. These Financial Statements have been prepared, for all periods presented, in accordance with *IAS 34, Interim Financial Reporting* as issued by the *International Accounting Standards Board (“IASB”)* and using the same accounting policies and methods of computation as were used for the Consolidated Financial Statements of the Company and the notes 2, 3 and 4 thereto for the year ended December 31, 2011 (the “2011 Financial Statements”), except for the following new accounting pronouncements which have been adopted. The Financial Statements should be read in conjunction with the 2011 Financial Statements.

(i) On January 1, 2012, the Company retrospectively adopted *IAS 1, "Presentation of Items of OCI: Amendments to IAS 1 Presentation of Financial Statements"*. The amendments stipulate the presentation of net earnings and other comprehensive income (“OCI”) and require the Company to group items within OCI based on whether the items may be subsequently reclassified to net earnings. The adoption of the amendments to this standard did not have a material impact on the Company’s financial statements. The Company has grouped the items within OCI based on whether the items may be subsequently reclassified to net earnings on the Condensed Consolidated statements of income.

(ii) On January 1, 2012, the Company adopted *IFRS 7 Financial Instruments: Disclosures, Amendment regarding Disclosures on Transfer of Financial Assets*. This amendment required the Company to provide disclosures for all transferred financial assets that are not derecognized and for a continuing involvement in a transferred asset, existing at the reporting date, irrespective of when the related transfer transaction occurred. There was no impact to the Financial Statements as a result of adopting this Standard.

(iii) On January 1, 2012, the Company adopted *IAS 12 Income Tax, Amendment regarding Deferred Tax: Recovery of Underlying Asset*. The amendment requires an entity to recognize a deferred tax asset or liability depending on the expected manner of recovery or settlement of the asset or liability and for which the tax base is not immediately apparent. There was no impact to the Financial Statements as a result of adopting this Standard.

2. Significant accounting policies continued:

(b) Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following:

(i) financial instruments at fair value through profit or loss are measured at fair value
(ii) available for sale financial assets are measured at fair value

(c) Principles of consolidation

Included in these unaudited condensed interim consolidated financial statements are the financial statements of Enterprise Oilfield Group, Inc. and its wholly-owned subsidiaries: Enterprise Energy Services Inc. ("EES"), E One Limited. ("EOL"), T.C. Backhoe & Directional Drilling Ltd. ("TCB"), T.C. Backhoe & Directional Drilling Limited Partnership ("TCBLP") and T.C. Backhoe Holdings Inc. ("TCH").

Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the unaudited condensed interim consolidated financial statements from the date that control commences until the date that control ceases. All subsidiaries have the same reporting periods as the Company.

All significant inter-entity balances and transactions, and any unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the unaudited condensed interim consolidated financial statements. The accounting policies set out herein have been applied consistently to all years presented in these financial statements, and have been applied consistently by the Company and its subsidiaries.

(d) Future changes in accounting policies

IFRS 7 Financial Instruments: Amendment regarding Offsetting Financial Assets and Financial Liabilities. This amendment enables users of the financial statements to better compare financial statements prepared in accordance with *IFRS* and US Generally Accepted Accounting Principles. The Company will start the application of *IFRS 7* in the financial statements effective from January 1, 2013. The Company does not expect any impact to the financial statements as a result of adopting this Standard.

IFRS 9 Financial Instruments: This standard replaces the current *IAS 39 Financial Instruments Recognition and Measurement*. The standard introduces new requirements for classifying and measuring financial assets and liabilities. The Company will start the application of *IFRS 9* in the financial statements effective from January 1, 2015. The Company has not yet evaluated the impact on the financial statements.

IFRS 10 Consolidated Financial Statements: This standard replaces the current *IAS 27 Consolidated and Separate Financial Statements*. The standard identifies the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The Company will start the application of *IFRS 10* in the financial statements effective from January 1, 2013. The Company does not expect any impact to the financial statements as a result of adopting this Standard.

IFRS 12 Disclosure of Interests in Other Entities: This standard requires disclosures relating to an entity's interests in subsidiaries. The Company will start the application of *IFRS 12* in the financial statements effective from January 1, 2013. The Company does not expect any impact to the financial statements as a result of adopting this Standard.

IFRS 13 Fair Value Measurements: This standard defines fair value, provides guidance on its determination and introduces consistent requirements for disclosures on fair value measurements. The Company will start the application of *IFRS 13* in the financial statements effective from January 1, 2013. The Company has not yet evaluated the impact on the financial statements.

2. Significant accounting policies continued:

IAS 28, "Investment in Associates and Joint Ventures: The amendments to require retrospective application and will be adopted by the Company on January 1, 2013. The adoption of the amended standard is not expected to have a material impact on the Company's consolidated financial statements.

*IAS 19 Employee Benefit*s: The standard prescribes accounting and disclosure for employee benefits. The Company currently contributes to a defined contribution plan. The Company will start the application of this standard in the financial statements effective from January 1, 2013. The Company does not expect any impact to the financial statements as a result of adopting this Standard.

*IAS 32 Financial Instruments; Offsetting Financial Assets and Financial Liabilitie*s: The amendment provides further clarification on the application of the offsetting requirements. The Company will start the application of *IAS 32* in the financial statements effective from January 1, 2014. The Company has not yet evaluated the impact on the financial statements.

3. Financial instruments and risk management

The Company's activities expose it to a variety of financial risks that arise as a result of certain financial instruments held such as:

- credit risk;
- liquidity risk; and
- market risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital.

The Board of Directors oversees managements' establishment and execution of the Company's risk management framework. Management has implemented and monitors compliance with risk management policies. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities.

(a) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is exposed to credit risk from customers. This risk is elevated in the current year similar to the prior year due to the impact of the current credit market and economy on its customers. The Company's maximum exposure is the value of its accounts receivable. However, to mitigate this risk the Company regularly reviews customer credit limits.

Trade and other receivables

The Company has accounts receivable from customers in the oil and gas industry, as well as the utilities and infrastructure industries. Credit risk is mitigated due to significant customers being large industry leaders, following a program of credit evaluation and limiting the amount of customer credit where deemed necessary. The Company monitors accounts receivable monthly to identify any amounts which are past due and considers if they are impaired. This assessment is done on an invoice by invoice basis.

The Company does not anticipate any significant default as it transacts with creditworthy customers and management does not expect any significant losses from non-performance by these customers. As such an additional provision for doubtful accounts of $nil has been recorded for March 31, 2012 (December 31, 2011 - $14,252).

The majority of the accounts receivable relates to sub division underground utilities installation for large energy and utility providers and as such invoices outstanding over 90 days are not uncommon. Management is aware of uncollectible receivables in this category of $nil, which is included in the $nil above (December 31, 2011 - $nil, which is included in the $14,252 above).

3. Financial instruments and risk management continued:

Included in accounts receivable at March 31, 2012, was $1,404,099 or 37% of total accounts receivable owing from three customers due to the significant contracts in progress at March 31, 2012. December 31, 2011 was $1,738,451 or 36% of total accounts receivable owing from three customers.

At March 31, 2012, and December 31, 2011, the Company's maximum exposure to credit risk in this area was as follows:

	March 31, 2012	December 31, 2011
Current (less than 90 days)	**$ 3,575,373**	$ 4,409,780
Past due (more than 90 days)	**224,906**	407,424
Total	**$ 3,800,279**	$ 4,817,204

Cash and cash equivalents consist of cash bank balances held in both interest and non-interest bearing accounts. The Company manages credit exposure of cash by selecting financial institutions with high credit ratings.

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements at: March 31, 2012 and December 31, 2011:

March 31, 2012 Non-derivative financial liabilities:	**Carrying amount**	**Contractual cash flows**	**Due within one year**	**Two-five years**	**More than five years**

	$ 7,769,160	$ 8,904,241	$ 7,260,501	$ 1,643,740	$ -

3. Financial instruments and risk management continued:

The Company may be exposed to liquidity risk if it is unable to collect its trade and other receivables balances on a timely basis, which in turn could impact the Company's long-term ability to meet commitments under its credit facility, or if the credit facility is not renewed requiring the Company to make unscheduled principal repayments. The Company's customers are subject to an internal credit review along with ongoing monitoring of the amount and age of balances in order to minimize the risk of non-payment. Long and short term cash flow forecasts are prepared and monitored to ensure adequate liquidity.

(c) Market risk

Market risk is the risk that changes in market prices, such as interest rates, will affect the Company's income or the value of the financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while maximizing returns. Management has assessed the effect of a 1% interest rate increase or decrease in the prime lending at March 31, 2012, rate to impact the Company's annual interest expense by approximately $22,880. The Company has not entered into any derivative agreements to mitigate this risk.

Capital management

The primary objective of capital management is to ensure the Company has sufficient capital to support its business and maximize shareholder value. The Company manages its capital in proportion to risk of the underlying assets and makes adjustments in light of changes in economic conditions and risks. The Company's strategy remains unchanged from prior periods. Management considers its capital structure to include net debt and adjusted capital of the Company, as reflected in the table below:

The Company's objectives when managing capital are:

- to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders;
- to provide an adequate return to shareholders; and,
- to finance its operations and growth strategies.

In order to maintain or adjust the capital structure, the Company may issue new shares, or sell assets to reduce debt.

The Company monitors capital on the basis of the net debt-to-adjusted capital ratio. This ratio is calculated as net debt divided by adjusted capital. Net debt is calculated as total liabilities (as shown in the balance sheet less trade and other payables, and less cash and cash equivalents). Adjusted capital comprises all components of equity (share capital, contributed surplus, warrants and deficit), other than amounts in accumulated other comprehensive income relating to the marketable securities.

		March 31, 2012		December 31, 2011
Total liabilities	**$**	**6,303,052**	$	7,769,160
Less: trade and other payables		**(1,375,059)**		(2,575,341)
Less: cash and cash equivalents		**(755,822)**		(357,203)
Net debt		**4,172,171**		4,836,616
Total equity		**9,162,214**		8,904,856
Add (less): amounts in accumulated other comprehensive (income) loss relating to marketable securities		**(32,000)**		4,000
Adjusted capital	**$**	**9,130,214**	$	8,908,856
Net debt-to-adjusted capital ratio		**0.46**		0.54

The decrease in the net debt-to-adjusted capital ratio during 2012 is the result of a reduction of net debt for the three months ended March 31, 2012, as compared to the year ended December 31, 2011.

3. Financial instruments and risk management continued:

Fair value determination

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(i) Marketable securities

The fair value of financial assets held as available-for-sale is determined by reference to their quoted closing bid price at the reporting date.

(ii) Cash and cash equivalents, trade and other receivables and trade and other payables

The fair value of cash and cash equivalents, trade and other receivables, and trade and other payables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. At March 31, 2012 and December 31, 2011, the fair value of these balances approximated their carrying value due to their short term to maturity.

(iii) Loans payable

The fair value of the loans payable is not determinable as loans with similar terms would not be available from third parties.

(iv) Loans and borrowings

Except for the New Term Loan Facility (8 (c)), the new finance lease liability (8 (f)) and the above loans payable, the fair value of all other loans and borrowings including bank indebtedness, approximate their carrying value as the interest rates on these instruments do not differ significantly from current market rates.

4. Income tax expense

(a) Reconciliation of effective tax rate

	March 31, 2012	March 31, 2011
Income (loss) before income tax	**$ 168,707**	$ (386,092)
Expected tax rate	**26.5 %**	26.5 %
	44,700	(102,300)
Increase (decrease) resulting from:		
Derecognition (recognition) of deferred tax asset	**(44,700)**	102,300
Total income tax expense	**$ -**	$ -

Management will recognize a deferred income tax asset when it is probable that future taxable profits will be available again which it can be utilized.

(b) Deferred tax assets and liabilities

In assessing whether the deferred tax assets are realizable, management considers whether it is probable that some portion of all of the deferred tax assets will be utilized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. As at March 31, 2012, the Company did not recognize approximately $2,903,700 (December 31, 2011 - $2,948,400) in deferred tax assets as their realization was not probable. The amount of deferred tax assets considered realizable, however, could be reduced in the near-term if estimates of future taxable income during the carry-forward period are reduced.

(i) EBITDAS represents earnings or loss before interest, income taxes, depreciation and amortization, and share-based payments. EBITDAS is not a standard measure that has any standardized meaning prescribed by *IFRS* and is considered to be a non-GAAP measure. Therefore, this measure may not be comparable to similar measures presented by other companies. This measure has been described and presented in the same manner in which the chief operating decision-maker makes operating decisions and assesses performance.

14. Significant events

On February 24, 2012, the Company entered into a financing arrangement with a Canadian financial institution to secure a $410,000 non-revolving term loan. The facility is secured by specific equipment, a general security agreement on all assets of the Company and guarantees by the Company and an officer and director of the Company. The fair value of the loan proceeds of $410,000 (face value) is $376,868. The facility is bearing interest at an effective rate of 5.585% and is at a stated interest rate of zero percent (0%) during the interest free period of the first 24 months of the loan. Principal payments only are required for the first 24 months of the loan, and principal plus interest for the remaining 24 months of the loan. The effective and stated annual interest rate during the interest period is 5.585%. The proceeds of the loan will be used to purchase a new directional drill for the underground utilities and infrastructure division and will be available for use across all of the Company's divisions. The Company expects the new drill to be delivered, and operational in May 2012, and will draw down the funds from the new term loan facility at that time.

15. Subsequent events

In April 2012, the Company entered into a new mortgage facility with a Canadian financial institution in the amount of $390,000. The mortgage is secured by specific property, guarantees by the Company and a director and officer of the Company. The facility, amortized over 156 months, has a 5 year term and is bearing interest at an effective rate of 6.010% with a stated interest rate of zero percent (0%) during the first 24 months of the loan. Principal payments only are required for the first 24 months of the mortgage, and principal plus interest payments are required for the remaining portion. The effective and stated annual interest rate during the interest period is 6.010%. This facility will be used to pay out the Company's existing mortgage facility.
